

ASSET TBSI

Temporary Barriers Solar Illuminator

Stay Safe in Low-Light Situations with
Temporary Barrier Solar Lighting

Introducing Asset TBSI:

Improve safety with the ultimate, temporary barrier illuminating solution. Specifically designed for use with Zoneguard, Varioguard, Multibloc and Rebloc products, to enhance visibility of our range of Temporary Vehicle Restraint Systems (TVRS) during low light conditions.

The Asset TBSI is attached with screws to securely fit the desired VRS barrier system.

Red and amber TBSI's are available, to accommodate verge and central reservation illumination.

Features:

Automatic Lighting

Solar sensor automatically activates in low light conditions, switching the units off during normal / day light hours.

Long Life

UV-resistant, waterproof device designed for a 5-year day/night cycle and extended lifespan.

Colour Options

Red for road verges and amber for central reservations.
