

Lunch & Learn

# Compliant design and installation of Temporary Vehicle Restraint Systems

**Available  
in person or  
on Teams**

We are dedicated to road safety and are committed to share our knowledge around the safe and efficient design, installation and use of temporary vehicle restraint systems.

Our team has decades of experience and extensive knowledge about relevant regulations and best practices.

## What will you learn about?

- / EN1317 crash testing and the correct use of temporary barriers
- / CD377, product selection and compliance
- / Intelligent design to meet project requirements
- / New solutions that provide increased efficiencies and support carbon reduction
- / Installation, innovation and service capacity levels

## Who is it for?

The presentation is suitable for everyone who is involved in temporary traffic management, and the design, sourcing and installation of temporary VRS systems.

## Our Presenters

**Nigel Bullock**  
Head of Solutions

**Scott Rose**  
Business Development Manager
